EDUCATION

University Of Texas at Dallas, Dallas — *Bachelors in Computer Science*

Fall 2019 - Current

I have a 3.6 Gpa, which is improving every semester.

The computer Science related Classes I have done at UTD are below:

Computer Science 1[C++]

Computer Science 2[Java]

Data Structure and Algorithms

Discrete Math 1

Computer Architecture[in progress]

Discrete Math 2[in progress]

Computer Architecture[in progress]

Probability and Statistic in Computer Science[in Progress]

PROJECTS

Pokemon Finder — Creator

This was one of my first projects, using the fetch api in Java Script to request the Pokemon API, and retrieve the data based on which Pokemon the user wanted. I then displayed the data in a website that I styled with css and html

Server Side for a Theater — Creator

This was my really large Java Project, I created a server side for a theater, where a user can log in and book tickets, check previous orders, delete or update previous orders. There is also an option where the admin can log in and check on all the orders and close the application. This was done through different data structures, and the io stream.

My Own Dynamic Website — Creator

I just created a simple website, using node js with express, and basic css, html, and JavaScript. The website just uses different buttons to send different get requests to the rest api I created on node js, where the api based on the button clicked would send the form of data back to load onto the website.

SKILLS

Java

Java Script

Css/Html

Learning Spring Boot

Intermediate with C++

Learning Node js with Express

MongoDB

AWARDS

Achieved the Academic
Excellence Scholarship at
University of Texas at Dallas.
